

## **Information about the Listen to Me project**

**Sometimes people go to hospital when they are sick.**

**Some people are happy about their time in hospital.**

**Some people are not happy about their time in hospital.**

**Sometimes it is hard to know who to tell about your time in hospital.**

**A Patient Reported Experience Measure or PREM is what hospitals call the survey to say what you think. We call it a PREM in this project.**

**Hospitals use PREMs to know how to care for people better.**

**We will make a PREM for people with intellectual disability in the Listen to Me research project.**
