Macquarie leading the way

Ranked in the top two per cent of universities globally, Macquarie is renowned for excellence in interdisciplinary research and teaching, our unique approach to learning, our highly skilled graduates and our first-class facilities.

World-class degrees

- Macquarie University equips you with a global mindset and an internationally respected degree – a degree which helps you develop creative problem-solving and critical thinking skills – capabilities that will benefit you now and in the future.

Real-world learning

- A Macquarie education is about far more than classroom learning; it's about real-world learning. You don't just learn from textbooks, you learn from the practical application of your knowledge in real-life organisations and environments.

Indulge your passions

- We encourage you to indulge your passions while learning. We do this through flexible unit selection, internal degree transfers, timetabling and teaching methods – because we know that balance is important in life.

Renowned teachers

- We translate what we learn in our research, and through collaboration with industry, into what we teach you. So when you study at our world-class university, you'll learn from passionate researchers who are pushing the boundaries of their field.

An interdisciplinary approach

- Macquarie pioneered interdisciplinary study – an approach which teaches you to think more broadly, to tackle the big questions in life and the things that really matter to society.

Earning your future

- When you graduate, you can expect an excellent employment rate and high starting salary. Eighty-eight per cent of our graduates are employed within four months of completing their study and earn above the national average starting salary.

Workplace ready

- Industry professionals tell us Macquarie graduates are an asset to their work environment – because as a graduate you will have the ability to adapt to a rapidly changing workplace gained through practical experience and world-class degrees.

World-leading research

- Macquarie is ranked 4th in Australia for our research at the highest level. In the Australian Government's Excellence in Research for Australia (ERA) initiative we achieved the maximum 5 rating (outstanding performance well above world standard) in various sciences areas.

Location, location, location

Not only will you be studying in 126 hectares of park-like campus just 15 kms from Sydney's CBD, you will also have the advantage of attending university in the heart of Australia's largest high-technology precinct.

Because of our location, our degrees offer outstanding integration with industry, which provides you with a superior learning environment, as well as enhanced internship opportunities and greater exposure to the job market prior to your graduation.

Law

You'll discover a broad view of the law and the world at Macquarie University.

- As pioneers of interdisciplinary law study in Australia, Macquarie gives you opportunities to explore more dynamic career choices. Combine your law studies with finance, media, IT, commerce or even psychology and expand your horizons.
- Our approach affords you the ability to think around problems and provide more innovative solutions. It's the Macquarie edge and it's highly valued by employers – helping you launch your career with leading firms across Australia and the world.
- Employers also value the fact you're studying in one of the most successful law schools in Australia. In the last few years Macquarie law students have been named Law Student of the Year by the College of Law and have won a Prime Minister's Australia Asia Endeavour Award. So if you want to study with the best and make the best of your future, then choose a degree with the Macquarie edge.

PHOTO: PHILLIPA JANOS

WHERE WE SHINE

- **Ryan Harvey**, a Bachelor of Commerce with Bachelor of Laws student, was named The College of Law – Law Student of the Year at the 2011 Lawyers Weekly Awards, has received the Law Society of NSW Prize for Sustained Academic Proficiency, and represented Australia in the Commonwealth Moot Competition. He is now working as an associate to the Honourable Justice John Dyson Heydon AC in the High Court of Australia.
- **Shaun Star**, a graduate of the Bachelor of Commerce with Bachelor of Laws, was awarded a prestigious scholarship in the inaugural Prime Minister's Australia Asia Endeavour Awards for outstanding students. The \$41,500 scholarship allowed Shaun to take up a placement with the National Law School of India, which provided him with a unique opportunity to undertake international study and research.

Learn from our leaders

At Macquarie you will learn from some of the best legal minds in the country. Our academics have enthusiasm and passion and enjoy building close bonds with students.

- **Penelope Watson** was awarded a Minister for Education and Training and Australian College of Educators (ACE) NSW Quality Teaching Award, a LexisNexis-Australasian Law Teachers Association Award for Excellence and Innovation in the Teaching of Law, a Macquarie University Vice-Chancellor's Award for Teaching Excellence, a Macquarie University Learning and Teaching Fellowship, and an Australian Learning and Teaching Council Citation for Outstanding Contribution to Student Learning.
- **Associate Professors Iain Stewart and Malcolm Voyce** and **Professor Rafiqul Islam** have each received a Macquarie University Outstanding Teacher Award.

Five reasons to choose law at Macquarie

- Macquarie pioneered the **interdisciplinary study of law**. Our Bachelor of Laws fosters a sound understanding of legal doctrine and focuses on all major areas of law – public, private and international
- Our law graduates are **highly sought after by employers** in the legal profession and other industries and organisations
- Dedicated **teachers who are active researchers** in their fields
- A legal education with a **character you won't find elsewhere**. You are encouraged to think critically and creatively, and to ask deeper questions about the law
- Our graduates are **winners of high-profile awards and find employment in leading firms** such as Allens Arthur Robinson and Clayton Utz, and as associates to Justices of the High Court of Australia

Louis Parfait

Bachelor of Business Administration with Bachelor of Laws

After just missing out on the ATAR required to get into Macquarie's law program, Louis Parfait was able to commence studying a Bachelor of Business Administration and transfer into a combined law program in his second year.

It was Macquarie's flexibility that drew Louis to Macquarie. Not only was he able to get into the

"Macquarie's law program has knowledgeable academics, many who are leaders in their field and write the textbooks we use. It is a well-rounded program as I have studied not only black-letter law but also delved into broader disciplines such as philosophy, history, ethics, economic and social theory and politics."

law program, he has been able to choose his own timetable allowing him to work during the week, and Macquarie's iLecture system means that he never misses out on a lecture.

Louis finished his Bachelor of Business Administration in mid-2011 and is now concentrating on his law studies. His aim is to become a solicitor in government or private practice and his degree will set him up with the necessary professional qualification as well as broad skills and abilities.

While at Macquarie, Louis has also taken the time to join the Mentors@Macquarie program, working as a mentor in 2010 and a team leader in 2011. This provided him with a great opportunity to develop organisational, leadership and communication skills while helping out new students.

Our Macquarie Law School community

Our interdisciplinary approach to the study of law ensures connected graduates who have strong ties to fellow students, staff, alumni and the wider law community. You will graduate from Macquarie as an innovative, competitive and competent legal professional.

Ryan Harvey

**Bachelor of Commerce
with Bachelor of Laws**

After receiving the Law Society of NSW Prize for Sustained Academic Proficiency, and representing Australia in the Commonwealth Moot Competition, Ryan Harvey finished his study at Macquarie with an even greater accolade. He was named The College of Law – Law Student

of the Year at the 2011 Lawyers Weekly Awards. During his time at Macquarie, Ryan led the Macquarie University Law Society and worked part-time as a research assistant at Allens Arthur Robinson. He is now working as an associate to the Honourable Justice John Dyson Heydon AC in the High Court of Australia.

“Staff at Macquarie go out of their way to give you a broad quality legal education. My education has given me my award, a clerkship and graduate position in a top Australian law firm and an associate position with a high court judge which only one person in the entire country gets every year.”

Shade Zahrai

**Bachelor of Arts – Psychology
with Bachelor of Laws**

The interdisciplinary and well-rounded educational approach of the law program drew Shade Zahrai to Macquarie University. She has found that the Macquarie Law School is committed to ensuring she is equipped with a

comprehensive knowledge of the law and legal theory, and the skills and capabilities required for any career path.

“Macquarie Law School has offered me unique opportunities to develop as a young leader, and legal practitioner. The supportive and student-friendly atmosphere makes for a fantastic learning environment, and students have a lot of fun along the way!”

Joshua Dang

**Bachelor of Media
with Bachelor of Laws**

Joshua Dang was attracted to Macquarie's law program due to its interdisciplinary approach to learning which ensures that students have a broad understanding of the law and how it will develop, rather than just current law related to legislation and cases. By joining the Macquarie University

Law Society he has been able to develop industry skills and make connections with those already in the legal profession.

“My degree helps me grow as a person and interpret what I’m learning from a global perspective. Macquarie provides a distinctive learning experience that you simply cannot find anywhere else.”

Helena Cantrall

**Bachelor of Arts – Psychology
with Bachelor of Laws**

Helena Cantrall decided to add what she calls a ‘twist’ to her university study – spending a session in the United States studying at St Norbert College in Wisconsin. Macquarie encourages its students to head abroad for a session or

two, and it didn't take long for Helena to work out why. For her it was not just the different location and classmates but also the academics with their unique life stories and different teaching styles which added a new dimension to her study.

“One of the best things about going on exchange through Macquarie is having completely different experiences to those on offer at home, while furthering your degree.”

Sebastian Hartford Davis

**Bachelor of Arts
with Bachelor of Laws**

Sebastian Hartford Davis graduated in 2009 and was Associate to the Chief Justice of Australia. His high UAI (now ATAR) allowed him his choice of universities, but he says not once has he regretted his decision to study at Macquarie.

“The campus was beautiful, the law school was full of inspiring scholars and like-minded students, and the sporting, academic and social opportunities were diverse. I have travelled all around Australia, Europe and East Africa with the support of the law school and the University. Macquarie allows a person to excel as an individual, in their own way, with the only barrier to success being your own work ethic.”

Liana Crowe

**Bachelor of Business Administration
with Bachelor of Laws**

Liana Crowe, who graduated in 2005 and is now a senior associate with Allens Arthur Robinson believes the strength of Macquarie's law program is that it is not just a 'black letter' law degree. The program not only teaches students what the law is and how it should be applied,

it also teaches students to critically analyse the law and to ask questions about why it's like it is, how it has evolved, where it's going, and how it can be improved.

“Now that I have been in practice for several years, I see how valuable Macquarie's approach has been. I find it fundamental in my role to constantly critique the law and understand the context in which it operates.”

Stuart Clark

**Chief Operating Officer and Managing Partner (International), Clayton Utz
Member of the first graduating cohort of law students at Macquarie Law School**

Since graduating from Macquarie in 1980 Stuart Clark has enjoyed a rich and varied career. He started as a litigator before working as a barrister after being admitted to the bar. Stuart returned to a traditional law practice after being invited to re-join Clayton Utz. Today he is in a management and leadership role at Clayton Utz which has 200 partners, 1800 staff and offices in Australia and overseas. He believes it was the skills and approach that he learned at Macquarie that has made this all possible.

“Macquarie Law School focuses on the skills that you really need when you move into a career – problem-solving skills, critical thinking, and communication skills. These skills are critically important. It gives you the entrée to an amazing range of careers and occupations.”

Degree options

You may complete the Bachelor of Laws (LLB) as part of a combined law degree program (undergraduate entry) or on its own (graduate/distance entry).

Combined law degrees offer you a choice of studying law in conjunction with a range of partner degrees drawn from all four faculties.

All combined law degrees are offered on a full-time basis and usually take five years to complete. This creates rich variety with 12 different combined law degrees available.

Bachelor of Laws entry pathways

Bachelor of Laws combined degree programs

Students who do not already hold a bachelor degree may study law at Macquarie as part of a combined degree. There are three main ways to enter combined law at Macquarie University.

Apply through the University Admissions Centre (UAC)

You can apply through UAC utilising an Australian Tertiary Admission Rank (ATAR).

Internal transfer for existing Macquarie University students

Students who successfully complete the first year of another degree can apply to the University under the internal transfer program for admission to a combined law degree. To be eligible to apply students must have completed at least 18 credit points and have a minimum Grade Point Average (GPA) of 3.0. Each year a maximum of 50 students may be admitted in this manner. Admission is competitive and based solely upon a student's GPA. Successful applicants will be offered a place subject to satisfactory completion of the two law units studied in the first year of the combined law degree.

Applications for internal transfer should be made directly to the Dean of Macquarie Law School, and close at the end of the first week of January each year.

Start another degree and then apply for Macquarie University law through UAC

After completing your first year of another degree you are able to apply again through UAC to enter into the combined law program of your choice. A combination of your ATAR ranking and your first-year university results will be taken into consideration. Your application will be considered against the strength of other UAC applicants.

Bachelor of Laws single degree programs

There are two ways of completing the Macquarie LLB as a stand-alone degree. The first is the graduate LLB and the second is the distance LLB.

Bachelor of Laws (graduate entry)

This program is available if you have already completed an undergraduate degree. It is offered on a full-time basis and it usually takes three years to complete.

Applications for entry to this program are made through UAC.

Bachelor of Laws (distance education only)

This is available if you are 21 or older and is offered by distance education on a part-time basis over a period of six years. It is suitable for people who cannot study full-time because of employment, family or other commitments, or who live outside the Sydney metropolitan area and are thus unable to attend regular classes. Distance students are required to attend compulsory on-campus sessions of two days for each unit. These sessions are usually held in April and September. A prior degree is not necessary, but often students complete a degree, use that qualification to enter the workforce and continue studying law while working.

Applications for entry to this program are through UAC.

PHOTO: FI GAYLOR

PHOTO: PAUL WRIGHT

Professor Natalie Klein
Dean, Macquarie Law School

After completing a masters and doctorate at Yale Law School and practicing at a New York law firm, Professor Natalie Klein returned to Australia, and Macquarie University, in 2004.

She teaches and researches in different areas of international law, with a focus on law of the sea and international dispute settlement. She also regularly provides advice, undertakes consultancies and interacts with the media on these issues.

Klein has served as counsel to the Government of Eritrea and was a consultant in the Office of Legal Affairs at the United Nations.

“I joined Macquarie as I saw the law school as on the rise and believed that I would be able to make valuable contributions to the curriculum and research culture.”

Bachelor of Laws

The Bachelor of Laws can be completed as part of a combined law degree (undergraduate entry) or on its own (graduate/distance entry).

Description

The emphasis on the interdisciplinary study and consideration of the law in its broader context is the hallmark of Macquarie University's law program. Students are taught to look beyond law as a function of rules and procedures or as a technical qualification.

Macquarie graduates understand how the Australian legal system works. Students learn about social, political, historical, cultural and economic factors that have influenced the law's development, and how the law is likely to change in the future.

Macquarie Law School delivers a high-quality educational experience that provides graduates opportunities to excel as ethical, proactive and innovative professionals.

Key features

- The interdisciplinary approach of the Macquarie law program has earned our graduates a reputation for being well-rounded and highly capable legal minds who also have a realistic understanding of the world, its people and the issues that bind them together.
- Macquarie Law School provides a range of flexible options to complete units for the Bachelor of Laws. Students can now elect to commence mid-year, while repeat and summer offerings in select units allow students to accelerate or spread out their study across the calendar year.
- Students learn from academics with practical experience as barristers and solicitors, who are actively engaged in research on contemporary legal issues, and involved in a range of professional and community outreach activities.
- Students can pursue their interests in a wide range of elective units where they will be challenged to tackle current 'real-world' issues. There is also the opportunity to complete one of three specially design Participation and Community Engagement (PACE) units, where students interact with practitioners from top Australian law firms, community legal centres, government, NGOs and a range of industries.
PACE: pace.mq.edu.au
- As well as participating in a range of competitions and moots, including the prestigious Jessup International Law Moot, students can become involved in the production of Macquarie Law School's peer-reviewed journals: *Macquarie Law Journal* and *Macquarie Journal of International and Comparative Environmental Law*.
- As one of the more than 120 student groups on campus, Macquarie University Law Society (MULS) provides opportunities for students to participate in a range of competition and mooting events, as well as to enjoy the social side of university life.
- Graduates will join distinguished alumni that includes some of Australia's leading judges, managing partners of national law firms, diplomats, Members of Parliament and academics. As an alumni of the University you will be offered the opportunity of ongoing support for your career development and an array of graduate services and benefits.
Alumni Relations: alumni.mq.edu.au

Research centres within Macquarie Law School

- **The Centre for International and Environmental Law** A centre of excellence focusing on international, comparative and national environmental law; marine law and oceans governance; planning and local government law; pollution law; and natural and cultural heritage.
- **The Centre for Legal Governance** The centre provides a platform for research into legal governance and regulatory problems facing governments, businesses and communities in the new world order, and contributes to the development of ethically informed legal and social policy.

What you can study

- Students will complete compulsory units designated by professional accrediting bodies as essential for admission to legal practice; including contract, criminal, tort, constitutional, administrative, corporate and property law, jurisprudence, professional ethics, equity, evidence and civil procedure.
- The law school recognises the importance of globalisation on Australia's legal system and has made international law compulsory at Macquarie.
- Students will be able to choose up to 10 electives from a broad range of law offerings, including one of three specially designed PACE units to round out the degree with a transitional study-to-work experience.
- Electives include cutting-edge topics within international, environmental, health, media, corporate, and information technology law, as well as units that deal with theoretical and moral reflections on legal institutions. Mooting and clinical elective units provide further opportunities to develop important legal and professional skills.
- The unit on alternative dispute resolution involves role-playing mediations and negotiations, simulating scenarios students will engage in professional life after graduation.

Career options

Many graduates will pursue careers as either barristers or solicitors. However, many other rewarding careers are open to law graduates. Employment can be found with a wide variety of institutions and organisations, both within the public and private sectors, including:

- | | | |
|---------------------------|-----------------------|--------------------------|
| • community legal centres | • in-house counsel | • the diplomatic service |
| • financial institutions | • legal practice | • the public service |
| • education | • media organisations | • trade unions |
| • health services | • NGO advocacy bodies | |

Recommended prior knowledge

First-year law units do not require any assumed knowledge, prerequisites or recommended studies. Other units taken as part of any combined degree may require assumed knowledge, prerequisites or recommended studies and you should refer to the related booklet(s) for the non-law component of the degree.

Accreditation

The Macquarie Bachelor of Laws is accredited with professional bodies regulating the admission of law graduates to legal practice and provides appropriate qualification for admission to practice as a lawyer throughout Australia.

In addition to completing a law program at an accredited institution, the profession requires all law graduates to complete a period of practical legal training including further study, continuing professional development units and supervised experience in a legal practice, before being admitted to practice as a barrister or solicitor. This typically takes six months to one year to complete, and involves options to study full-time, part-time and online.

To be qualified as an Australian Legal Practitioner in New South Wales, a solicitor or barrister also requires a Practising Certificate issued by the Councils of the Law Society of New South Wales or the New South Wales Bar Association respectively. Similar bodies and systems of accreditation exist in the other states.

Bachelor of Applied Finance with Bachelor of Laws

Description

The study of applied finance focuses on money, banking, investment and credit, providing an in-depth understanding of financial organisations, markets and instruments and their effect on the flow of funds within the economy. Macquarie Law is committed to providing students with knowledge of legal principles and the critical and analytic skills to apply those principles in a variety of scenarios. A combined degree in applied finance and law maximises employment opportunities by giving you practical financial skills supported by an informed awareness of the role of law in our economy.

Key features

- The study of applied finance at Macquarie is based on three major aspects of finance: corporate finance, investments and financial markets. Students will learn from highly qualified lecturers who have a practical understanding of finance industry practices or are active researchers in their field of law.
- A Macquarie law degree prepares students to take advantage of the expanding range of opportunities that a law degree brings. The law program is designed to foster a sound understanding of legal doctrine as well as an awareness of the role of law in society and a developed sense of social responsibility.

What you can study

- | | | |
|------------------------|---------------------------------------|-----------------------------|
| • accounting | • credit, market and operational risk | • intellectual property law |
| • commercial law | • derivative pricing | • IT law |
| • consumer law | • environmental law | • international law |

The Bachelor of Laws is accredited with professional bodies regulating the admission of law graduates to legal practice. The Bachelor of Applied Finance has been approved by ASIC (Australian Securities and Investments Commission – authorised assessors) as meeting ASIC training requirements.

Bachelor of Arts with Bachelor of Laws

Description

The Bachelor of Arts combined with law provides students with the greatest flexibility. All majors available in an arts degree can be taken in the combined law degree. Graduates with a Bachelor of Arts with the Bachelor of Laws demonstrate skills and capabilities that are sought after by all employers, including creative problem solving, critical analysis, highly developed communication skills, flexibility and exposure to diverse cultural and intellectual backgrounds.

Key features

- Students will benefit from Macquarie's flexible degree structure, which allows for the exploration of ideas within and across disciplinary boundaries.
- Studying current research theoretically and practically with active researchers, students will develop advanced knowledge in a specific discipline area and skills in research, communication and critical thinking.
- Students are encouraged to connect with careers and communities via internships, work-integrated learning opportunities and study abroad, either in a residential course organised by the University, or for one or two semesters under various exchange agreements.

What you can study

Bachelor of Arts – Media with Bachelor of Laws

Description

Media law is a fast-growing area of expertise. Graduates of this program will find employment in a wide range of media-related industries.

State-of-the art facilities have been custom-designed for the study of media and creative practice at Macquarie University, providing professional quality studios for screen production, drama, dance, music recording and radio production. Five fully equipped computer labs also offer students in the various media disciplines the creative and personal space to develop their projects.

In addition to core theory units, students can focus on one particular media form, or mix and match. Write, shoot and produce films, compose feature stories for publications in both print and online, design interactive media environments, manage a public relations campaign or make a radio show and have it broadcast.

Key features

- The key feature of this combined degree is flexibility. As part of the Bachelor of Arts program, media at Macquarie allows students to explore a range of units from across the University, combining their other interests with a focus on media studies and practice.
- The Department of Media, Music, Communication and Cultural Studies at Macquarie is run from a custom-designed building with professional studio spaces, industry-standard digital workstations for all production areas, a specially equipped theatre for screenings and digital production tools.
- Teaching staff are widely published academics and award winning media producers with industry experience in their area of expertise. Macquarie also has strong industry ties and a growing internship program, so students can spend a semester in a relevant work placement.

What you can study

- | | | |
|-----------------------------|-------------------|------------------------|
| • documentary | • media theory | • professional writing |
| • intellectual property law | • multimedia | • radio production |
| • media law | • music and sound | • screen production |

Bachelor of Arts – Psychology with Bachelor of Laws

Description

Psychology explores the connections between behaviour and mental processes. In the first year of this degree, in addition to core law subjects, students will be exposed to a wide range of fundamental psychological concepts and study the evolution of psychology as a discipline and important figures in psychology's history, such as Jung and Freud. In the second and third years students can enrol in more specialised units that include personality, psychopathology, child psychology and neuropsychology.

Key features

- The psychology program is one of Macquarie's largest undergraduate programs.
- Graduates can pursue careers where their psychology studies allow them to specialise in their work as legal practitioners (barristers or solicitors), legal officers in public or private sectors, and legal academia.
- For students who do not necessarily want to become a psychologist, this degree will provide knowledge of psychological principles and useful training in psychology for careers requiring an understanding of human behaviour.

What you can study

- biopsychology and learning
- cognitive processes
- criminology
- design and statistics
- developmental psychology
- health law and ethics
- perception
- principles of psychological assessment
- psychological science: putting theory into practice
- psychology
- social and personality psychology

Career options

- advertising copywriter/creative
- broadcaster
- community services consultant
- criminology researcher
- educational researcher or report writer
- health department researcher
- human resources consultant
- in-house, public or private practice legal practitioner (barrister or solicitor)
- journalist
- marketing consultant
- media researcher
- public relations
- rehabilitation assistant
- training consultant

Recommended prior knowledge

No specific entry requirements are necessary, however mathematics is recommended.

The Bachelor of Laws is accredited with professional bodies regulating the admission of law graduates to legal practice. The Bachelor of Arts – Psychology is accredited by the Australian Psychology Accreditation Council which enables students to pursue further study in the profession of psychology or a higher research degree.

Bachelor of Business Administration with Bachelor of Laws

Description

This combined degree provides an impressive joint qualification in business and law. In this degree students study critical business areas including marketing, management, accounting, statistics, computing, human resource management and finance. They also gain knowledge of legal principles and the critical and analytic skills to apply those principles in a range of business contexts, as well as an understanding of established areas of law such as constitutional law, international law, contract law and family law. Students will also become aware of contemporary issues in areas such as consumer law, environmental law, health law and information technology law.

Key features

- This combined degree is unique among business degrees due to the broad scope of the core units and the range and flexibility of our electives.
- Graduates will be entitled to admission for professional practice in New South Wales, subject to the requirements of professional training. The program contains all subjects required by the authorities concerned with professional practice and necessary for admission to the College of Law.
- The Macquarie law program is committed to developing a thorough knowledge of law in addition to critical thinking.

What you can study

- | | | |
|---|-----------------------------|--------------------------------------|
| • business communications | • human resources | • property in law and equity |
| • commercial law | • intellectual property law | • strategic management |
| • constitutional law and administration | • international law | • taxation law |
| • contracts | • IT law | • techniques and elements of finance |
| • corporate governance | • marketing | |
| • financial management | • media law | |
| | • principles of management | |

Career options

- | | | |
|--------------------------------------|--|----------------------------------|
| • arts administrator | • human resources manager | • market research analyst |
| • business development consultant | • in-house, public or private practice legal practitioner (barrister or solicitor) | • recruitment specialist |
| • government policy/planning adviser | • journalist | • researcher |
| | | • social services policy adviser |

Bachelor of Commerce with Bachelor of Laws

Description

With a thorough legal and commercial understanding of business and trade, students will be evidence-driven, world-ready business professionals.

Commerce is the exchange of goods or commodities either domestically or internationally. Students study core subjects in management, marketing, finance and accounting and then complete a major to develop depth in their chosen commerce discipline.

Macquarie law provides a solid foundation in established areas of law such as constitutional law, international law and contract law. Students gain knowledge of commercial legal principles and the critical and analytic skills to apply those principles in a variety of contexts.

Key features

- The Bachelor of Laws qualifies graduates for admission to legal practice. It involves an innovative approach to legal education and scholarship. Personalised teaching and development of internet technology in the curriculum reinforce Macquarie's reputation for innovation.
- The Bachelor of Commerce allows students to pursue an interest in business and finance with a range of majors that include accounting, commercial law, demographics, economics, international business and marketing.

What you can study

- | | | |
|---|------------------------|--|
| • accounting | • contracts | • legal governance and professional leadership |
| • business organisations | • corporate governance | • taxation law |
| • commercial law | • international law | • techniques and elements of finance |
| • constitutional law and administration | • IT law | |
| | • marketing | |

Career options

- | | | |
|---|--|---|
| • arts administrator | • government policy/ planning adviser | • researcher |
| • business development consultant | • in-house, public or private practice legal practitioner (barrister or solicitor) | • social services management consultant |
| • community legal centre consultant | • media analyst | |
| • environmental organisation business manager | • merchant banker | |

Bachelor of Commerce – Professional Accounting with Bachelor of Laws

Description

Accounting is the collection, measurement and communication of economic information which is used for planning, reporting and decision making. With both a legal and commercial understanding of business and trade, students will be evidence-driven, world-ready business professionals, highly eligible for employment in all areas of commerce, industry and government.

In this degree students study techniques and elements of finance, management, microeconomics, marketing, auditing and statistics. They will examine the role of law in society and in particular business, property and international law.

Key features

- This combined degree program provides students with a solid understanding of business principles, specialised accounting skills, a thorough knowledge of legal principles, and the critical and analytic skills to work within a wide range of business contexts.
- The Macquarie professional accounting program meets the tertiary accreditation requirements for all three professional accounting bodies in Australia. Bachelor of Laws graduates will be entitled to admission for professional practice in New South Wales, subject to the requirements of professional training.

What you can study

- accounting
- business organisations
- commercial law
- contracts
- corporate accounting and reporting
- corporate governance
- financial management
- intellectual property law
- international law
- IT law
- legal governance and professional leadership
- litigation
- statistics
- techniques and elements of finance

Career options

- accountant
- auditor
- chartered accountant
- financial analyst
- forensic accountant
- futures trader
- government accountant
- human resources manager
- in-house, public or private practice legal practitioner (barrister or solicitor)
- investment manager
- merchant banker
- public practice accountant
- stockbroker
- strategic business consultant
- superannuation adviser
- taxation consultant

Accreditation

The Bachelor of Laws is accredited with professional bodies regulating the admission of law graduates to legal practice. The Bachelor of Commerce – Professional Accounting satisfies tertiary requirements for entry into CPA Australia's CPA program, the ICAA's CA program and the IPA's PNA program.

Bachelor of Environment with Bachelor of Laws

Description

This combined degree will prepare students for a career in the fast-growing area of environmental law, dealing with the legal implications of science and sustainability. In this program students develop a keen understanding of the relationships between science, economics, ethics and law by studying the science, technology and legislation associated with environmental science and exploring people's perceptions and desires when tackling environmental issues in the real world.

Students undertake a major or minor in one of six designated science areas (biology, climate science, chemistry, environmental Earth science, environmental geology and spatial information science) plus a major or minor in environmental management.

Key features

- This combined degree produces graduates who have the legal and scientific knowledge in addition to the critical analysis skills required for employment in decision-making, policy implementation and legal consultancy across a spectrum of environment-related fields and industries.
- Students learn from highly qualified lecturers who have a practical understanding of environmental science.
- Graduates of this degree will be entitled to admission for professional practice in New South Wales.

What you can study

- applied climatology
- biodiversity and conservation
- chemical analysis
- ecology and evolution
- environmental and groundwater geophysics
- environmental geology
- environmental health and assessment
- environmental law
- environmental management
- field geology and mapping
- health law and ethics
- geomorphology – rivers and catchment systems
- international environmental law
- local government and planning law
- microbiology
- spatial information systems

Career options

- consultancy and education
- environmental policy and planning
- foreign environmental agencies
- in-house, public or private practice legal practitioner (barrister or solicitor)
- media consultant
- mining and other resource industries
- resource management

Bachelor of Information Technology with Bachelor of Laws

Description

The use of information technologies in business and government increasingly raises legal issues around intellectual property, knowledge management and software use. In this degree students specialise in developing computer skills to build and use information systems or to manage data while exploring the relevant legal frameworks for these processes.

Key features

- There is an increasing requirement for lawyers with specialised knowledge and skills in information technology, telecommunications and the internet who can manage critical issues related to commercial, regulatory and intellectual property law.
- A software development lifecycle project in the final year allows students to put all their skills to work in a challenging case study and provide evidence of their skills set to employers.
- Graduates of this combined degree will be entitled to admission for professional legal practice in New South Wales.

What you can study

- | | | |
|--------------------------|-----------------------------|------------------------|
| • accounting | • information systems | • mathematics |
| • business organisations | • intellectual property law | • media law |
| • computer science | • IT law | • optical technology |

Bachelor of International Studies with Bachelor of Laws

Description

In a rapidly shrinking world the ability to understand, appreciate and assimilate into other cultures is a highly valued skill in all industries. The Bachelor of International Studies with the Bachelor of Laws opens the door to employment related to international legal, cultural, social and political endeavours.

This degree suits students who are interested in contemporary society, other cultures and in the global society of the future, and who want to learn a foreign language and want to study overseas for part of their time at university.

Key features

- Students will spend a semester at a university overseas, and will also have the opportunity to undertake a focused internship linked to the language and culture they are studying, either nationally or internationally.
- Undertaking this combined degree at Macquarie University provides students with an unmatched range of languages, both Asian and European.
- The interdisciplinary approach of the University allows students to integrate aspects of politics, international relations, public law and history into their study.

What you can study

- Chinese
- Croatian
- French
- German
- Italian
- Japanese
- Modern Greek
- Polish
- Russian
- Spanish
- Asian, European and Latin American societies and culture, past and present
- cross-cultural communication
- global citizenship
- heritage conservation
- international environmental law
- international human rights

Career options

- broadcasting
- international business and law
- journalism
- public service and private consultancy
- translation and interpreting

Bachelor of Science with Bachelor of Laws

Description

The Bachelor of Science combined with law provides students with the greatest flexibility. All majors available in an science degree can be taken in the combined law degree. Graduates with a Bachelor of Science with the Bachelor of Laws demonstrate skills and capabilities that are sought after by all employers, including creative problem solving, critical analysis, highly developed communication skills and flexibility.

Key features

- Some majors related to the Bachelor of Science are available by distance education using study guides, reading programs, audio CDs and web-based materials (short, intensive on-campus sessions may be required).
- This combined degree features a strong focus on practical work that enhances the development of skills and problem solving abilities. Within the Bachelor of Science, high-quality laboratories offer exposure to modern instrumentation and tools.
- Dedicated links with both industry and government provide opportunities for practical experience, while teaching by internationally recognised researchers ensures state-of-the-art scientific knowledge.
- Macquarie offers unique opportunities for global education, including study abroad, internship and volunteer positions.

What you can study

- | | | |
|---------------------|-----------------------------------|---------------|
| • biology | • health law and ethics | • mathematics |

Bachelor of Social Science with Bachelor of Laws

Description

Macquarie is committed to being a leader in both teaching and research across the social sciences. The core of the Bachelor of Social Science develops an understanding of how we see the world, what questions we ask about it, and will challenge students to think not just why we ask these questions, but also what we can and should do with the answers we find.

There is a strong emphasis within the degree on social research design, methods, practice and application across a range of data analysis techniques and technologies. This emphasis provides graduates with a flexible set of vocational skills and capabilities offering an understanding of issues in culturally diverse social environments in both local and global contexts. Students are prepared for a wide variety of research and policy-related careers in both the private and public sectors.

Key features

- The program provides specific skills in applied social research and offers a wide knowledge base for understanding issues in a culturally diverse social environment.
- The focus of the degree is vocational and Macquarie aims to instil in graduates the confidence and capability to excel in any challenging employment environment.
- Macquarie internships offer a unique chance to gain experience at work by applying skills gained in study to the design and conduct of a research project within a placement at one of our partner organisations.

What you can study

- | | | |
|--|----------------------|-------------------------|
| • anthropology | • family law | • philosophy |
| • business demography | • gender studies | • politics |
| • criminology | • human geography | • psychological science |

B Social Science with B Laws	5F	96.05	300319

Double degrees

Double degrees fast track your study – you usually complete double degrees one or even two years faster than consecutive single degrees. You also increase your career flexibility and enrich your studies, with different areas of knowledge feeding into each other. Some double degrees fall within the same discipline and some fall across different disciplines.

How are they structured?

Double degrees can be structured in two ways:

You can complete the degrees at the same time, such as the Bachelor of Arts with the Bachelor of Science, or you can complete one degree after the other, such as the Bachelor of Arts with the Diploma of Education.

In either structure you save time. Double degrees allow you to complete two degrees in less time than it would take to complete each separately.

There are many advantages to studying double degrees. In particular double degrees:

- increase flexibility and choice
- combine fields to enrich studies
- increase career prospects and adaptability
- develop your ability to transfer knowledge
- offer the chance to meet students with diverse interests and backgrounds
- provide a broad range of complementary skills

Who do they suit?

Double degrees are ideal for students who have interests in a number of areas who wish to 'test drive' various fields; or students who have two strong, complementary interests; or students who recognise the increasingly interdisciplinary nature of study and work. There's a double degree to suit everyone.

Double degrees – law

Find out how a double degree gives you a competitive edge
ask.mq.edu.au

We're with you all the way

Starting university is an exciting time, but adjusting to university life can sometimes be challenging. To help out, Macquarie offers a range of resources and support programs that you can access throughout your time on campus.

Academic assistance programs

Depending on your chosen degree, you may find it beneficial to obtain certain academic skills before starting university. The following programs and services are designed to ease your transition into academic life.

Mathematics – Numeracy Centre

The Numeracy Centre offers free help with the maths or stats component of any first-year course, including statistics, psychology, economics, physics, accounting, actuarial studies, electronics, biology, chemistry and maths. The centre works on a drop-in basis during the week, and runs a variety of bridging courses at the beginning of every session.

Contact 📞 📧 📧

maths.mq.edu.au/numeracy

Writing Skills

This program offers a number of opportunities to improve your writing. A seminar on essay writing is held as part of the orientation program for new students in February/March each year. Two hour workshops on various aspects of academic writing are held during the year.

Life on campus

University isn't all about classrooms and exams. It's also about making new friends, enjoying new experiences and learning about other cultures.

Most students will tell you that getting involved with campus activities makes your university experience more enjoyable. At Macquarie, opportunities for involvement start right at the beginning of first semester at O Week.

O Week (O for orientation) runs for the first four days of semester and is a great

Welcoming you to Macquarie and easing the transition

Academic Orientation and Mentoring

Macquarie University is known for its friendly and welcoming atmosphere. We are also recognised for our mentor and transition program.

The Mentors at Macquarie Program is one of Australia's longest running peer support programs. Since 1997, with our help, tens of thousands of students have made the successful transition to university life.

Mentors will give you advice on learning at university, help you to find your way around the campus and give you the best tips and tricks on settling in. The program is run by students for students and is a fun, relaxed and enjoyable way to meet new people. Our mentors are the best and brightest from second year and above, are from a wide range of backgrounds, and are more than happy to answer any questions that you might have.

You can meet our mentors during Academic Orientation and O-Week festivities and drop in and see us anytime throughout semester at the Learning Helpdesk in the library.

Contact 📞 📧 📧

mq.edu.au/transition

opportunity to meet new people and find out what university life is really about. But this is just the beginning. As a Macquarie student you will have the option of playing competitive or social sport and attending all sorts of on-campus events such as concerts, themed party nights, DJ competitions, trivia nights and theme weeks.

Macquarie's student groups

It's also popular to join Macquarie's student groups. Created by students for students, the clubs are a great way to meet people and experience new things. With over 130 clubs to choose from – from professional, cultural, artistic and sporting, to religious, political, humanitarian or purely social – we're sure you'll find something of interest at Macquarie.

A new community

As a new Macquarie student you will soon realise that the campus is its own little community. You will find many places to eat, drink, shop and be entertained so you'll never feel stressed trying to fit things in around your lectures. Plus, there are a host of health services such as doctors, chiropractors, physiotherapists, a pharmacy, a free counselling service and even a private hospital.

Stay fit and healthy on campus

Macquarie has the most modern sporting facilities of any university in Australia. We've got a heated outdoor 50m swimming pool, a 25m heated indoor swimming pool, a gym, as well as group fitness, cycling and yoga studios. The Centre also includes squash courts, a basketball hall, sports hall, badminton courts and a martial arts area.

Indigenous Support Services

Macquarie is committed to encouraging participation by Aboriginal and Torres Strait Islander students. Specific support services are provided to Indigenous students through Warawara – Department of Indigenous Studies. Services include a computer lab, student common room, tutorial room, an Indigenous Student Support officer and the Indigenous Tutorial Assistance Scheme.

Warawara

Warawara Alternative Entry Program

The Warawara Alternative Entry Program is an equity initiative aimed at increasing Aboriginal and Torres Strait Islander participation within bachelor degrees. It provides opportunities to Indigenous Australians who may not have completed their HSC or acquired a necessary score for entry into their degree of choice.

As part of the selection process some applicants may be required to attend an assessment workshop. Particular courses may require additional supporting information: offers will be made according to merit, based on demonstrated capacity to undertake university study.

Potential applicants are strongly encouraged to contact the Indigenous Student Support Officer prior to application.

Macquarie University Library

A library is a library, right? Wrong. Macquarie's library is unique in Australia. As well as having high-tech robots which will find and deliver books to you in minutes, it's also a versatile learning, research and social space.

The five floors include learning lounges, quiet study areas, computers, printers and copiers, presentation practice pods, Australia's first automated document storage and retrieval system (that's the robots), and a café.

As a Macquarie student you will have access to a wide range of

specialist research collections, general study materials, and to online journals, books and newspaper articles.

But that's not all. The library is seeking to create a new standard of environmental sustainability on campus by gaining a 5 Green Star Rating from the Green Building Council of Australia.

Our scholarships your financial boost

Each year Macquarie University awards over \$2 million in scholarships. Most have a strong emphasis on social inclusion and are awarded on the basis of financial need or other hardship. Others recognise factors such as academic excellence or sporting achievement.

Macquarie University Merit Scholar Program (Aspiring Professionals Program)

This scholarship, worth \$12,000 per year for 5 years, is available to students with an ATAR of 98.5 or above. The highly competitive and non-deferrable scholarship is awarded on the basis of academic merit. Students can also augment their application by demonstrating financial need or other hardship.

Macquarie University Mature Age/Non-Current School Leaver Scholarship

Macquarie University recognises the financial needs of mature age students/non-current school leavers who are interested in undertaking undergraduate study. Selection criteria takes into consideration a range of factors including financial disadvantage, sole parent or carer responsibilities and whether the applicant has completed a university degree before. This scholarship is worth \$4754 annually for up to four years.

Macquarie University Education Cost Scholarship

This equity-based scholarship supports recipients whose opportunities to study at university may have been hampered by situations out of their control. The scholarship provides students with \$4754 annually for up to four years. Financial hardship, long-term medical condition and long-term carer responsibilities are some of the situations that have been recognised as relevant for receiving this scholarship.

Macquarie University Accommodation Scholarship

This scholarship, worth \$9508 annually for up to four years, supports recipients whose living situation may have hampered their ability to study at Macquarie and who would benefit from relocation from regional or rural Australia to study at Macquarie.

Macquarie Higher Study Scholarships

This scholarship helps recipients continue their studies to an advanced coursework or honours level by offering \$9508 annually. Students will need to be able demonstrate a need for this financial support.

Find out if you are eligible for a scholarship
[arts.mq.edu.au/undergraduate_programs/
prizes_and_scholarships](http://arts.mq.edu.au/undergraduate_programs/prizes_and_scholarships)

Alex Mitchell Scholarship (supported by the University's Alumni)

This scholarship enables the holder to pursue a full-time bachelor degree majoring in a subject area within the Faculty of Arts.

The scholarship is awarded on an annual basis to an incoming undergraduate student who demonstrates outstanding academic merit and commitment to social issues. It is valued at \$7500 over three years.

alumni.mq.edu.au

Macquarie Indigenous Top-Up Scholarship

This scholarship rewards Indigenous students at the commencement of their second and subsequent years of study. The University offers these top-up scholarships to each recipient of an Indigenous Access Scholarships. It increases in value each year up to \$3000 in the fourth year of study.

Macquarie University Refugee Scholarship

Macquarie University recognises the particular financial and other support needs of students from a refugee background. To complement the University's Refugee Mentoring Program, which raises aspirations towards tertiary study among refugee children, two scholarships are offered each year to students from refugee backgrounds. These scholarships are valued at \$4754 per annum for up to 4 years.

Most centrally administered scholarships are available for both Session 1 and Session 2 intakes. Applications are generally made through the Universities Admissions Centre.

How to apply

Undergraduate students

Domestic students

Domestic students with a NSW/ACT Australian Tertiary Admissions Rank (ATAR) or equivalent qualification apply through the Universities Admissions Centre. On-time applications close on 30 September 2012.

The UAC guide is available from the Co-op Bookshop, UAC and large newsagencies in August each year. Further information can be obtained at www.uac.edu.au

International students

International students with an international qualification apply directly to Macquarie International at international.mq.edu.au/applications

International students with one of the following qualifications need to apply through UAC at www.uac.edu.au/international

- an Australian Year 12 qualification (eg NSW HSC, VCE, SA Matriculation) either inside or outside of Australia
- the International Baccalaureate in Australia
- the New Zealand Certificate of Educational Achievement (NCEA) Level 3 in New Zealand.

It is important to adhere to the acceptance and payment deadline indicated in your Letter of Offer as places are limited in all programs.

Mature age students (at least 21 years of age at 1 March 2013)

Students who have previously attempted university study apply through UAC. www.uac.edu.au

Students who have not attempted university study are eligible to apply directly to Macquarie University through the Mature Age Jubilee Scheme by 30 September 2012.

Aboriginal and Torres Strait Islander (ATSI) applicants

ATSI students may gain admission through the normal Year 12 entry qualifications, though they may also apply through the Alternative Entry Schemes and Pathways for special admission.

mq.edu.au/future_students/undergraduate/alternative_access/

T: (02) 9850 8036
warawara.mq.edu.au

Session 2 applications

Not all courses are offered in Session 2. Visit the Macquarie Coursework Student Enquiry Service for more information. student.edu.au/ses

Distance education

All applications for the Bachelor of Arts (distance) and Bachelor of Science (distance) must be done online. www.coe.edu.au.

Applications for the Bachelor of Education (Early Childhood Education) (distance), the Bachelor of Teaching (Birth to Five Years) (distance) and the Bachelor of Laws (distance) must be done through UAC. www.uac.edu.au

The closing date for all distance study in Session 1, 2013 is 30 September 2012, except for the Bachelor of Education (Early Childhood Education) (distance), which closes on 30 October 2012.

PHOTOS: J. GAYLOR

Need another way in? We've got you covered

Schemes and pathways

There are a number of pathways to study at Macquarie University for students who do not meet the academic requirements for entry.

Alternative entry pathways may be used by mature-aged students, high school leavers with an insufficient ATAR, students wishing to transfer institutions, elite athletes and artistic performers, or students who have been disadvantaged during their high school studies.

More information can be found on the various pathways at futurestudent.mq.edu.au/entrypathways

Pathways to Macquarie include:

- Diploma of Languages
- distance education
- Educational Access Scheme (The Lighthouse Scheme)
- Elite Athletes and Elite Artistic Performers Scheme
- internal transfers
- Macquarie University Foundation Program
- Macquarie University Warawara Indigenous Alternative Entry program
- Mature Age Jubilee Scheme
- non-award program
- Open Universities Australia (OUA)
- Special Tertiary Admissions Test (STAT)
- Sydney Institute of Business and Technology (SIBT)
- TAFE graduates and associate degrees
- transfer from another university
- uniTEST

Students should seek qualified academic advice regarding their individual circumstances from the University.
